From Richmond.

[Correspondence N. Y. Herald.]

THE PRESIDENT TO VISIT RICHMOND. RICHMONE, August 13 .- The President of the United States, accompanied by Hon. Edwin M. Stanton, Secretary of War, it is confidently asserted, will visit Richmond during the last week in August. The main object of the visit will be to attend a council of the leading general officers of this and an adjacent military depot in reference to the condition of affairs in this section, as affected by the policy of President Johnson's administration. The council will be held in the private parlors of the Jeff. Davis mansion, where the late President Lincoln met the prominent Southerners

President Lincoln met the prominent Southerners during his stay here, and which is at preset the official residence of Major-General Terry, commanding this department.

Ameng the distinguished officers who will meet the President and Secretary on the occasion, will be Major-General Terry, Major-General Turner, Major-General Terry, Major-General Schofield, Major-General Turtis, Major-General Schofield, Major-General Howard, of the Freedmen's Burcau at Washington; General J. B. Hawley, Chief of Staff to the Commanding General, and others. This interview was originally set down to be held at Fortress Monroe, but the confinement at that post of the state prisoner, Jefferson Davie, it is alleged, renders the holding of a great civil and military council within its walls impracticable and impolitic. There can be little doubt that final action upon great issues of State policy with reference to the attitude of this people growing out of the recent anomalous election held in this city will be determined upon after the return of the President and Mr. Stanton to Washington. It is expected that one effect of this movement will be to materially placate the approaching Congress, which assemble now, would not prove very tractable upon-several issues of national moment. THE GOVERNOR'S POLICY.

THE GOVERNOR'S POLICY.

The policy heretofore pursued by Governor Pierpoint in effecting the restoration of Virginia is to undergo an immediate and radical change. The Governor is now satisfied that the intentions of the leading men of the State, as expressed to him upon his accession to power here, have not been carried out in good faith, and that he now has every reason to distrust the representations of their loyalty, so profusely made to him in the earlier days of his occupancy. These men promised Governor Pierpont that if he would aid according to the measure of his power in restoring them to the franchise, they would see that none but consistent Union nien were elected to offices. The result has been otherwise to such an extent as to imperatively compel him to change his policy, in which action he will have the cordial endorsement of President Johnson, who views the perfidy of these chivalrie Southerners in the same light as his Excellency. NEGRO LABOR FOR NEW YORK.

A large number of negroes are now being contracted for at the Freedmen's Bureau in this city to proceed to Cayuga, Wayne county, New York, for the purpose of felling a large tract of valuable timber in the marshes of that section. This is a new direction for negro labor.

PERSONAL,

Col. Wm. L. James, the able and efficient Chief Quartermaster of the Department of Virginia, is confined to his residence by illness.

General Robert E. Lee has been tendered the Presidency of Washington College, situated at Lexington, in this State. It is known that he has declined the position. He still continues in the country.

climed the position. He still continues in the country.

Hon. Martin F. Conway, formerly a member of Cengress from Kansas, and at present a counsellor at law in this city, has taken up his permanent residence at "the Slashes," a short distance from Ashland, near Richmond, and the birthplace of the immortal Henry Clay.

Colonel Augustus Sage, of New York city, has been appointed by Governor Pierpont commissioner of Virginia, to reside in the matropolis. Col. Sage is in the office of Hillyer & Kellogg, Broadway.

Major-General Chas. Devens has loft Fredericks-lurg, Va., en route for his new command in South Carolina. SERIOUS RIOTS

are prevailing in Petersburg, growing out of a contest between the blacks and the poor whites as to which shall have the monopoly of cleaning the

WASHINGTON'S WILL.

The original will of General George Washington was delivered yesterday to the Clerk of the County Court at Fairfax by Colonel C. H. Lewis, Secretary of the Commonwealth of Virginia. The writing is in the own handwriting of the illustrions "Father of his Country," plain and legible, and signed at the bottom of each page, showing the preciseness and promptitude of business which always distinguished him. This will was preserved from the destruction attendant upon the evacuation of the city by the former Secretary of State, Colonel Munford, who secured it in the iron safe of the capitol, thereby showing the veneration in which he held the name of the great man, the mention of which causes the heart of every true American to swell with gratitude and love, halling him as the deliverer of the country.

The city grows more and more dull. WASHINGTON'S WILL.

The city grows more and more dull.

Feats of the Yankee Blondin.—Harry Leslie, the great American Funambulist—for his friends scout the idea of his being styled the "American Blondin;" and, as he has so far excelled Blondin in his daring exploits, he consents hereafter to repudiate the cognomen—made another of his daring ascensions on Thursday last. Long before the appointed hour, a tremendous crowd had collected to witness the feats of this unrivalled rope walker. Before the ascension, a carriage handsomely decorated with flags and plumes, bearing Leslie, dressed in a magnificent gold costume, his pretty wife and little child, drove through the principal streets of Niagara. At quarter past five o'clock in the afternoon, the trio mounted the platform, where, among other distinguished persons who honored him with their presence, was ex-President Millard Fillmore and lady, to whom Leslie and family were introduced, and who wished him a speedy and safe journey over the water. Leslie crossed to the Canada side amid the applause of the crowd, performing his usual feats, among which that of running out on the guy ropes, throwing himself at full length on his back, &c. Or his return he carried on his back a moderate-sized cooking stove, which he deposited on the centre of the main rope, made his own fire, prepared cooked and ate his omelette, and safely returned with all his furniture to the starting point. At nine o'clock in the evering he made another ascension, dressed in white, discharging fire-works at either end. When at the centre of the rope, on his return, and the light from the pyrotechnical exhibition had ceased. Blondin being lost in comparative darkness, he dropped a large white cloth, which some supposed to have been himself, and quite a sensation was produced until he appeared on the American side to receive the congratulations of his family and friends. We understand Leslie purposes to make another ascension on the 10th instant, at which time he will cross with two pails of water on his shoulders and a

LATEST MARKET REPORTS.

[From the New York Herald, August 15.]

Monday, August 14—6 P. M.—Breadstofffs.—Received 16,949 bbls. flour; 820 do. corn meal; 126,646 bushele wheat; 253,725 dc. corn; 39,169 do. cats; 712 do. rye, and 628 do. malt. There was but little change in State and Western flour. The demand was moderate, and common grades favored the buyer, while prime was a trille firmer, though not quotably higher. There was no export demand, the news from the other side being even less favorable than that by previous steamer. The sales were 12,500 bbls., the market leaving off quiet at our revised quotations annexed. Southern flour was fairly active, and prices for all graces were steady. The sales comprised 600 bbls. The inferior and common brands of Canada flour were somewhat duli, while good and choice grades were a shade better. The sales were 450 bbls. Rye flour was quiet and unchanged. Corn meal was quiet, and prices were nominally unchanged. We quote:
Superfine State and Western Flour. \$5.90@ \$6.15 Extra State. 6.60@ 6.65 Choice State. 6.60@ 6.65

meal was quiet, and prices were nominally unchanged. We quote:

Corn meal, Jersey. 4.90@ 5.00
Corn meal, Brandywine, puncheons. 20.00@
The wheat market at the opening ruled quiet but firm for winter, and dull and heavy for spring, under the combined influences of heavy receipts and unfavorable European news. The export demand was checked, and we did not hear of a single engagement to any European port. The demand subsequently was more active, and, with large speculative sales, the market closed firm. The sales embraced 115,000 bushels, at \$2.05@2.07 for number Milwaukee; \$1.43@1.45 for Milwaukee cluty; \$1.42@1.43 for Chicago spring, and \$1.88@1.95 for winter red Western. The receipts of corn were enormous, comprising upwards of a quarter of a million bushels, and it was rumored that the receipts were not all bulletined at that—some contending that there were samples offering for full 400,000 bushels. Inder these circumstances the market of course ruled dull and heavy, but the advance in gold and the firmness of freights tended to check the demand, and caused a slight decline. The sales were about 22.000 bushels. Under these circumstances the market of course ruled dull and heavy, but the advance in gold and the firmness of freights tended to check the demand, and caused a slight decline. The sales were about 22.000 bushels. Inder these circumstances the market of course ruled dull and heavy, but the advance in gold and the firmness of freights tended to check the demand, and caused a slight decline. The sales were about 22.000 bushels. Inder these circumstale firm a tour anywerd measurement of the prices. Oats were steady

price.
Corron.—The market was dull, but holders were generally firm at our annexed quotations. The sales were 800 bales. We quote:

Upland. Florida. Mobile. N. O. & T.

%d. Hops were more active, at firmer rates. The sales, consisting of 140 bales common to prime, chiefly for consumption, at 15c.@35c., and 75 do. extra fancy Western at 40c.@50c.

consisting of 140 bales common to prime, chiefly for consumption, at 15c.@35c., and 75 do. extra faney Western at 49c.@50c.

Molasses.—The market was quiet and unchanged. We learn of no transactions.

Provisions.—Receipts, 915 bbls. pork, 134 do. lard, and 30 pkgs. cut meats. The pork market was again irregular. The pressure to sell on the part of some operators was again observable, and under the influence of this prices fell off half a dollar from the closing prices of Saturday, and but little desire was manifested to purchase even at the reduced rates. Nevertheless, the business was fair, but mainly in lots on the spot—not a few of the purchases being to fill maturing contracts. The sales were 4,200 bbls. at \$32@33 for new mess, closing at \$32.25, \$29.50@30.50 for old do., \$24 for prime, and \$27.25 for prime mess. The beef market was inactive, but prices were steady. The sales were 350 bbls. at \$8.50 (21.250 for plain mess and \$10@14.50 for extra mess. Beef hams were quiet and unchanged. Bacon was dull and prices entirely nominal. Cut meats were moderately active and steady; the sales were 300 packages, at 15@11c. for shoulders and 19½@23½c. for hams. The lard market was quiet and unchanged. To bbls. sold at 19½.@4½c., the latter an extreme price. Butter remained steady at 23@28c. for Ohio and 39@35c. for State. Cheese was only in light demand at 9½@16½c. for common to prime.

PERROLEUM.—The market remained quiet but firm.
We quote: Crude 32½c.@35c. Refleed. in bond. 52 kc.

was only in light demand at 9%@16%c. for common to prime.

Petroleum.—The market remained quiet but firm. We quote: Crude 32%c.@33c. Refined, in bond, 52%c. @53c., and do., free, 70c.@72c.
Rice was quiet at our provious quotations.
Sugan.—The market was fairly active at full prices.
The sales of raw comprised 1200 hids. Cubs muscovada, at from 11%c.@13%c., and 2000 boxes Havana at 11%c. @16%c. Messrs. Stuart report refined sugars %c. lower, as follows: Best crushed, granulated and ground, 19%c.; white A, 18%d., and yellow 0, 17%c.
TOBACCO.—The market was quiet, but prices were without material change. We note sales of 140 hids. Kentucky at 7%c.@22c. Receipts, 2738 bbls.
TALLOW.—The market was more active and prices were again a shade firmer. The sales were 180,000 bs. at 11c.@13c.
WHISKY.—Receipts, 91 bbls. The market was less active, but prices were steady. The sales were 175 bbls. Western at \$2.19.
In its money article, the Herald says:

In its money article, the Herald says:

In its money article, the Herald says:

Government securities were not so strong, and a slight falling off was submitted to, owing, we presume, to the reported weakness of United States stocks in Europe. The coupon five-twenties, new issue, sold for 104½, coupon ten-forties for 97½, first scries of seven and three-tenths Treasury notes for 99, and the second series for 98%; one year certificates brought 97%.

There is comparatively very little demand for money, and the market rules easy at seven per cent.

Gold was streughtened this morning, and the premium ranged between 42½ and 49.

Foreign exchange has assumed a firmer tone.

The bank statement shows a further falling off of loans and deposits. The former have decreased within the past three weeks \$7,500,963, and the latter has been reduced \$18,051,905.

Some little excitement was occasioned in the street today bysthe announcement that the checks of Mr. Peter R. Mumford, a gold room operator, had been dishonored. On Saturday last he received large amounts of gold, variously estimated at from eighty to over one hundred thousand dollars, for which he gave checks, the payment of which was refused to-day. A private meeting of his creditors was held this morning, and in the course of a day or two it will be made clear whether the case is one of absolute fraud or a simple failure. His liabilities are said to be \$130,000.

[From the New York Express, August 5.] PHILADELPHIA, August 15.—Petroleum firm, crude at 31. Refined in bond 62c.; free 68½@70c. Flour firm; market generally unchanged, with little export demand. Wheat has an advancing tendency; sales of new Red at \$2.05@2.13; Old do. 2.15@2.20½. Corn firm; sales of Yellow at 98c. Oats firm; sales of New at 82c; Old 72c.; Whisky dull; sales at 2.25.

BALTIMORE, August 15.—Flour dull and inactive sales of Howard superfine at \$8.50; wheat quiet; Corn quiet and declined 2 cents; Provisions steady. Western lard advanced; Whisky closed arm at \$2.24.

BUFFALO, August 15.—Flour steady, demand moderate; Wheat heavy, inactive and nominal; Corn lower, with fair demand at 78@79c for mixed, closing quiet; Oats firm at 574; Barley and Rye nominal. Whisky at \$1.15; Mess Pork at \$32. Canal Freights lower to New York; Wheat 14@14)4c; Corn 12@12½c.

NEW ORLEANS, August 12.—The receipts of cotton continue largely in excess of the demand, and the stock, which reaches nearly 70,000 bales, is becoming univieldy. Prices are one to two cents per pound off, as compared with Monday last.

Silver half dollars are selling it 40 per cent premium. Gold is not plentiful, but tresh arrivals are dally looked for.

ed for. [From the Augusta Constitutionalist, August 17.]

[From the Augusta Constitutional III, August 18.]

NEW YORK, August 15.—Corron dull and declining at 44c. Flour \$6.65. Whisky steady. Wheat advanced 2c. Corn 80@01c. Data 65c. Coffee dull... Sugar steady. Cuba Muscovado 18c. Molasses dull. Pork dull at \$33. Sterling exchange quiet at 109. Gold 142%.

ST. LOUIS, August 15.—Corrow receipts 667 bales. The market is quiet at 890; Flour unchanged. Corn dul' 18 86. Totacco active at 195 to 197. Whishy undull at sec. Those co active at 155 to 157.

Changed. August 16.—Corron.—A good deinand and considerable transactions during the day at 50 to 30

cents.

Gold.—Brokers are selling at 45, buying at 40 to 43, according to quantity, with fair demand.

LIVER COMPLAINT-AND DYSPEPSIA.
It is estimated that seven-tenths of all adult alimenus
proceed from a diseased and torpid liver. The biliary
secretions of the liver overflowing into the stomach
poison the entire system and exhibit the above symp-

After long research, we are able to present the most remarkable cure for these horrid nightmare diseases the world has ever produced. Within one year over six hundred and forty thousand persons have taken the PLANTATION BITTERS, and not an instance of complaint

hundred and forty thousand persons have taken the Plantation Bitteren, and not an instance of complaint has come to our knowledge!

It is a most effectual tonic and agreeable stimulant, suited to all conditions of life.

The reports that it relies upon mineral substances for its active propercies, are wholly false. For the satisfaction of the public, and that patients may consult their physicians, we append a list of its components.

Calibrata Bank.—Celebrated for over two hundred years in the treatment of Fever and Ague, Dyspepsia, Weakness, etc. It was introduced into Europe by the Countess, wife of the Viceroy of Peru, in 1640, and afterwards sold by the Jesuits for the enormous price of its own weight in silver, under the name of Jesuit's Powders, and was finally made public by Louis XVI, Ring of France. Humboildt makes especial reference to its febrifuge qualities during his South American travels.

Cascanilla Bark.—For diarrhæs, colic and diseases of the stomech and bowels.

DANDELION—For inflammation of the loins and dropsical affections.

CHAMOMILE FLOWERS—For enfeebled digestion.

LAVENDER FLOWERS—For enfeebled digestion.

LAVENDER FLOWERS—For enfeebled digestion.

LAVENDER FLOWERS—For enfeebled digestion.

LAVENDER FLOWERS—Aromatic, stimulant and tonic—highly invigorating in nervous debility.

WINTERGREEN—For scrontals, rhoumatism, etc.

Anse—An aromatic carminative; creating flesh, muscle and milk; much used by mothers tursing.

Also, clove-buds, orange, carrawsy, coriauder, snake-root; etc.

S. T .-- 1860--- X.

Another wonderful ingredient, of great use among the Spanish ladies of South America, inparting beauty to the complexion and brilliancy to the mind, is yet unknown to the commerce of the world, and we withhold itahang for the present.

IMPORTANT CERTIFICATES.

Rochestes, N. Y., December 29, 1861.

Messrs. P. H. Drake & Co.—I have been a great sufferer from Dyspepsis for three or four years, and had to abandon my profession. About three months ago I tried the Plantation Bitters, and to my great joy I am now nearly a well man. I have recommended them in several cases, and as far as I know, always with signal benefit.

I am respectfully yours, REV. J. S. CATHORN.

PHILADELPHIA, 10th Month, 17th Day, 1862.

RESPECTED FRIEND:—My daughter has been much benefited by the use of thy Plantation Bitters. Thou wilt sond me two bottles more.

Thy friend, ASA CURRIN.

BHERMAN HOUSE, CHICAGO, ILL., Feb. 12, 1863.

Messra, T. H. DRANE & Co.—Picase send us another twelve cases of your Plantation Bitters. As a morning spectizer, they appear to have superseded everything else, and are greatly esteemed.

Yours, &c., GAGE & WATTZ.

Arangements are now completed to supply any domand for this article, which has not heretofore been possible.

able.

The public may rest assured that in no case will the perfectly pure handard of the Plantarion Bitting be departed from . Heavy folds barr the facts mile of our signature on a steel plate engraving, or it cannot be genuise.

Any person pretending to sell Plantarious Bittern in the public and investor. Recommended to the property of the property of the property of the public and investor. by person pretending to sell PLANTATION BITTERS in or by the gallen; is a swindler and imposter. Beware filled bottles. See that our Private slamp is Unmurr-ti over corry cork. I d by all Druggists, Grocers and Dealers throughout ountry.

FERTILIZER FOR COTTON, ETC.

MAPES'

NITROGENIZED SUPERPHOSPHATE OF LIME.

FOR COTTON, TOBACCO, WHEAT, CORN, &c.

COMPOSED OF DRIED BLOOD, BONES, SULPHURIC ACID, PERUVIAN GUANO, SULPHATE OF AMMONIA, POTASH AND SODA. Large Silver Medal awarded 1859, by the American Institute of New York—Patented 1859—Perfect uniformity of quality—Testimonials from hundreds who have used it for years—Does not exhaust the land like Guano, but permanently improves it—One hundred pounds of Nitrogenized Superphosphate of Lime will equal in effect and lasting power one hundred and eighty-five pounds Peruvian Guano—Produces heavier bolls of Cotton, and greater weight of Wheat and other Grain, per bushel, than Peruvian Guano—Prevents Rust. than Peruvian Guano—Prevents Rust.

Messrs. Fisher & Haskell, Cotton Flanters at Newbern, N. C., write, July, 1865, as follows:

"The Phosphate of Line we purchased of you gives good satisfaction. Lust year we applied fifty-five (55) tons to three hundred and seventy-five (375) acres of land for cotton, say about (300) three hundred pounds per acre. We rubbed the seed in the Phosphate, and also sowed it in the drill with the seed at the time of planting. On a portion of the land we applied a top dressing of the Lime at the second hoeing. Throughout the season the cotton plants grew well—the leaves were of a dark, healthy color, and "No Bust" was seen on the plantation. The ravages of the army worm prevented us from resilizing the benefit from our outlay for the Lime in full, still the large number of partly grown bolls and forms gave some idea of what the crop would have been could they have matured. Although we saved a large quantity of manure on the place last year, our confidence in the value of your Phosphate led us to purchase of you last spring seventy tons, one-half of which we used ourselves, and the balance was bought for a friend, who was satisfied of its worth in cotton culture. At the time of writing this, our crop is looking finely, and promises an abundant yield. One portion of our plantation consists of highlands with a clay subsoll, running near the surface; the remainder is flat and inclined to be sandy. The owner of the place tells us that he did not succeed with cotton on this last part; but owing, as we think, to the liberal use of your Phosphate, we have now a good crop growing upon it. This is but the second season of cotton growing with us; still, from our experience thus far, we do not hesitate to recommend your Phosphate of Lime as a Libral well adapted to the wants of the cotton planter."

NEWBERRY, S. C., October, 1860.

Professor J. J. Mares—Dear Sir: I bought twenty bags of your Nitrogenized Superphosphate of Lime, of it agents, Messrs. H. & N. E. Solomon, Hamburg, S. C. (who solicited a statement of its effects), and applied it

your Agents, Messrs. H. & N. E. Solomon, Hamburg, S. C. (who solicited a statement of its effects), and applied it to forty acres of my poorest cotton land.

This land is on the public road, where its effects were seen. My neighbors, who are acquainted with the land, were astonished at the luxuriant growth of the cotton where I used your Superphosphate. It produced better cotton, and a larger amount, than on my good land; less work was needed in making the cotton than on my other land. Not a particle of rust was to be seen where I applied your Superphosphate, while the rust prevailed over every other portion of the crop.

Respectfully yours,

Note.—Mr. Payne's good land compares favorably with the best cotton lands on the Saluda Biver. The Saluda ottoms are proverbial for producing large quantities of cotton.

COTTON.

Mr. J. J. Mapes—Dear Sir: In reply to yours of the 1st inst., I cheerfully state: I have used Mapes' Nitrogenized Superphosphate of Lime on my cotton of the present year, and am perfectly satisfied with its yield.
I can recommend it to my neighbors with confidence, as a pure and effective manure, and would give it the
preference to any other in the market. Yours, respectfully,

Mr. Charles W. Mixon, of Edenton, Chowan County, N. C., writes to Mr. Bockover:
In regard to Mapes' Phosphate it worked admirably for me, the product being fully equal if not superior to both the manures before mentioned. It did not start the young plant as early as either the other manures; but it seemed to retain its color and pods much better, and no symptom of rust was ever seen where it was applied—all the land I planted-in cotton being about the same quality and strength.

CHARLES W. MIXON.

Extract from a letter from Colonel Gideon Dowse, of Berzelia, near Augusta, Ga., August, 1860;
J. J. MAPES—Dear Sir: I have no hesitation in saying that on my own farm your Superphosphate has been, and is now, superior in its effects, where I have applied it on my cotton, to either lot-manure or cotton seed; and, as compared to the land without manure in the same field (in my opinion the only true way to test it), it is as four to one in the number of grown bolls, and as ten to one in the young fruit and forms, in favor of the Superphos-

as compared to the number of grown bolls, and as ten to one in the young fruit and forms, in favor of the Superphostone in the number of grown bolls, and as ten to one in the young fruit and forms, in favor of the Superphose.

This opinion is formed from a close and critical examination by my overseer and myself. There is one result from its application, which, if it had nothing else to recommend it, is of incalculable value, and that is, it does seem to guard against that worst enemy of the cotton plant, namely, the rust.

I have applied it to land that invariably rusts cotton, and there is as yet not a sign of rust in it, while the same kind of land just adjoining is completely ruined by it already.

This experiment confirms that made by Mr. Lomas, of 3. C., last year; and I am fully persuaded that any plant manured with it does withstand a drought better and keeps green longer than with any other application that has come under my notice. I have seen cotton, corn, okra, melons and other garden plants, that have kept green during the terrible drought that has so completely destroyed all our gardens, and my nutmeg melons are as green and blooming as beautifully as in spring.

I have written this as the result of my judgment from close observation. When I shall have gathered my crops it will give me pleasure to give you the result from actual weight and measure.

GIDEON DOWSE.

"We have, in the course of an extensive agricultural correspondence, gathered evidence of the superior value of Mapes' Nitrogenized Superphosphate of Lime upon the cotton fields of the South, where Peruvian Guano had been used with partial success. The bolls have been keavier, and of greater number, the yield of cotton per acre has been larger, and what is also of the greatest consequence, no rust is discovered in cotton fields where this article is applied, to which may be added its peculiar lasting power of fertilization, and its comparative cheapness. These fasts have come to us in correspondence from parties who have used other like agents, and who give this by far the highest praise.

"We have arrived at the conclusion, after considerable experiment ourselves, and of careful search for the results of the trials of others; this Mapes' Fertilizer has more of the property needed in a general manure, in horticulture and agriculture, than any thing else of the kind we are acquainted with." Extract from Weekly Day-Book:

Figurial. B. C., October 10, 1860.

J. J. Mares, Esq., New York—Dear Sir: I bought four tons of your Superphosphate of Lime for my cotton prop. also some guano, and have tried them side by side on the same quality of land. Not a particle of rust was to seen where your Superphosphate was used, and I also applied stable manure on a portion of my land. The oction had the rust when the latter was used. The yield of cotton was applended when the Superphosphate was used, despite the extraordinary dry year. When I applied the other manure the yield was not good.

I applied the Superphosphate at the rate of 100 lbs. per acre, and believe it would have paid better if I had put more per acre.

I applied the Superphosphate at the late of low agents per scree.

Book per scree.

I sold my cotton in Hamburg yesterday at 1/c. per pound over the usual market price. The lint was considered very strong and heavy. I consider yours a reliable manure.

JAMES M. LANHAM. Among the many patrons of this manure are the following gentlemen, who have testified in the highest terms of its value:

Dr. N. Crawford, Columbia Co., Ga.; W. H. T. Wainer, U. S. A., Mobly, Fond, Ga.; L. Berchmans, Augusta, Ga.; J. P. Brown, Big Lake Plantation; Carliale P. B. Martin, Macon, Ga.; E. M. Pendleton, Sparta, Ga.; Colonel Goodwin, Columbia, S. C.; and many others in all the Southern States, whose names can be found in a pamphlet published by CHRICLES V. MATE3, Centeral Agent 1.2 the Manufacturer, No. 184 Water-street, New York.

237 Price \$60 per ton (2000, pounds), in barrels.

Liberal discounts allowed; and Circular, etc., with name and Dukiness address, furnished gratis to responsible Pounces acting as accounts.

mess acting as agents.

BONE DUST, (UANO, esc., furnished by cargo or by the ton. Orders for the Superphosphate of Lime will be

P. H. KEGLER, No. 173 East Bay.
